and benefits of
Agfa HealthCare
Enterprise Imaging!

Hospital management

Discover the cost, quality,
and benefits of Agfa HealthCare
Enterprise Imaging !

What if you had a solution that could help you deliver **high-quality and cost-effective care**?

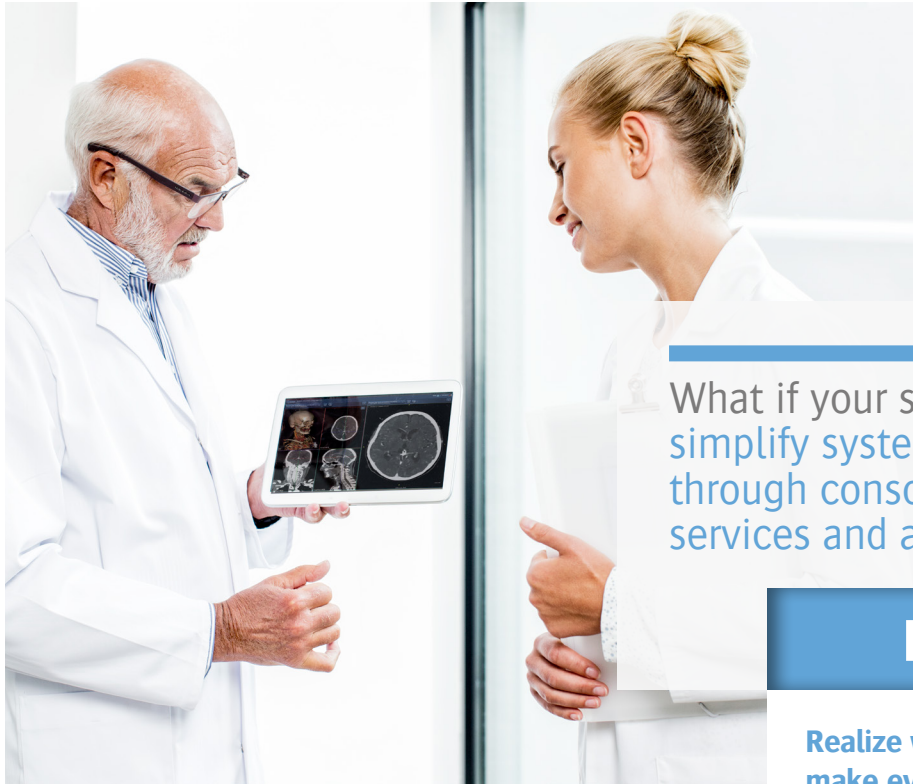

Savings

Reduce costs and leverage existing investments

With Enterprise Imaging you can reduce costs in a number of areas: from lower consumable usage, to more efficient use of resources like staff and space, to fewer image retakes. Consolidating your IT infrastructure lets you leverage your existing investments, while reduced report turn-around time speeds up patient throughput.

Looking for a way to get high performance, reliability and scalability, with a lower total cost of ownership? Let us host your Enterprise Imaging solution for you. We'll take care of the day-to-day management, with predictable and all-inclusive service costs, including high availability and disaster recovery at a fraction of the cost of building your own.

What if your solution could help
**simplify system management
through consolidating imaging
services and applications?**

Productivity

Realize workflow improvements that make everything faster

With a streamlined, uncluttered interface and extremely intuitive features and tools, Enterprise Imaging lets radiologists and their staff work in a way that makes great sense for the digital age, and reduces training and operational costs. The task-based workflow keeps track of details, priority rules and more. In this way, the hospital-defined workflows are followed and workloads can be better balanced.

What if you had a solution that
would **enhance staff workflows,
collaboration and satisfaction?**

Staff satisfaction

Let your staff work how they want, where they want

Enterprise Imaging makes working with images easy and flexible. Advanced and specialized clinical and measurement tools are built right in, saving time and effort. The unified imaging platform provides interoperability and real-time exchange of information, while easy-to-use collaboration, chat and sharing functions enhance cooperation with peers, referring physicians and other institutions. Reporting is fast, easy and personalized, and the results can be distributed via fax, print, email, web or accessed through the EMR. All of these features create a highly efficient workflow.

What if you had a solution that would speed up the care process and improve the patient experience?

Care

Improve diagnostic confidence with value-driven care

Value-based care requires close coordination between care providers and other resources to achieve high-quality, high-value care while reducing additional medical services. Enterprise Imaging makes images available quickly, while supporting greater information exchange. So medical decision making and collaboration are enhanced, and patients wait less time for a diagnosis. Furthermore, more comprehensive access to images may result in fewer repeated exams: which means potentially less radiation dose for the patient – a priority for everyone in the care continuum!

What if you had a tool that could help to provide better insight into your operations?

Knowledge

Get insight into your operations

Enterprise Imaging can provide you with a wealth of information about your facility and its operations. With your data in clear and transparent tables, graphs and live dashboards, you can make better-informed decisions, improve clinical productivity and operational quality, optimize resource allocation and increase the satisfaction of patients and referring physicians alike. The Live dashboard gives you a live view of the operations and performance of the radiology department, providing actionable information to resolve bottlenecks, while productivity analysis, workflow analysis and quality control reports put the data from Enterprise Imaging at your fingertips.

Discover the cost, quality, and benefits of Agfa HealthCare Enterprise Imaging !

Seamless solution

You can enable seamless interoperability and much more with Enterprise Imaging, a completely unified imaging platform that includes PACS, reporting, advanced image processing and integration of clinical information, **all in one sophisticated platform**.

As healthcare demands shift towards a value-driven approach, collaboration, sharing, cost control and efficiency are more important than ever. Enterprise Imaging supports your hospital with a consolidated platform that **eliminates information silos and unifies access to images, all while reducing costs** in a number of areas.

Rich clinical information, enhanced collaboration and easy access to diagnostic tools improve the delivery of patient care, with both staff and patients enjoying **greater satisfaction** with the care process.
