

Enterprise Imaging RUBEE® Orchestrator

Make Your Workflow Actually Flow

That's life in **flow**.

AGFA 
HealthCare

In the fast-evolving landscape of modern healthcare, health systems often struggle to streamline workflows and create efficiencies. AGFA HealthCare Enterprise Imaging presents a groundbreaking solution to continuously optimize and tailor workflows, enabling healthcare providers to achieve their goals with high productivity.

AGFA HealthCare **RUBEE® Orchestrator** is a transformative software service that redefines how providers manage their daily activities and collaborate to focus on what matters most: creating efficiencies and improving productivity.

Tasked with Creating Efficiencies

We're revolutionizing task assignment for radiologists and enhancing throughput and efficiency.

With workflow orchestration, studies are intelligently assigned based on elements like shift schedule, online status, and more – as determined by your organization – allowing for a more efficient and high-quality resource allocation. In addition, the organization of a worklist for diagnosticians can be optimized to reduce task switching and thus supporting them to stay in the flow and focus on the delivery of patient care.

Multi-Level Configuration

One of the key advantages of **RUBEE® Orchestrator** is its flexibility in configuration. Health systems can configure the solution at different levels – be it at the location, department, or individual provider level. This adaptable approach empowers the creation of individually curated work assignments based on custom prioritization logic. Prioritization and distribution logic considers service-level agreements, availability, credentialing, individual preferences, shift work completion, and various other factors, supporting fair and balanced workloads for each team member.

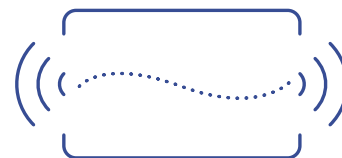

Customized Flexibility

At the heart of **RUBEE® Orchestrator** lies the power of customization. AGFA HealthCare understands that no two health systems are alike, and one-size-fits-all solutions are inadequate. With our intelligent workflow orchestration technology, health systems gain the freedom to tailor the solution to their specific needs and goals. This enables seamless integration with existing workflows and empowers providers to work in a way that aligns with their unique preferences and objectives. For example, you can set different turn-around time requirements for different facilities to create preferential assignment of studies based on your defined logic.

Real-time Streaming Technology

Enterprise Imaging workflow orchestration can utilize AGFA HealthCare Enterprise Imaging Streaming Client technology. This web-based, natively developed service displays large amounts of data in seconds. Even with large studies, providers can access information, transcend geographical boundaries, and streamline workflow efficiency.

Create an Imaging Health Network™ (IHN)

RUBEE® Orchestrator workflow orchestration and Streaming Client come together in support of consolidated reading within your enterprise. AGFA HealthCare Enterprise Imaging (AGFA EI) enables a seamless and secure community of care. Across specialties, your enterprise's sites, geographies, time zones, and more – this solution pairs with Enterprise Imaging RUBEE® Orchestrator to empower you in supporting exceptional delivery of patient care.

[More About IHN](#)

RUBEE® Orchestrator through Enterprise Imaging introduces a transformative solution that empowers health systems to optimize their workflows with flexibility, customization, and efficiency. Providers can focus on patient care while AGFA EI intelligently optimizes and manages task assignments, fostering collaborative practices. Embrace Enterprise Imaging Workflow Orchestration and revolutionize your healthcare journey today.

[More About RUBEE® Orchestrator](#)

RUBEE® Orchestrator creates Efficiencies and Empowers Productivity

For Health Professionals

- Reduced interruptions with intelligently populated workflows.
- Spend less mental energy determining which study to read next.
- Seamless access to studies and real-time collaboration for radiologists all in one place.

For IT Professionals

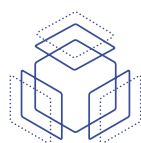

- Granular control over logic for continuous optimization.
- Easy to learn user interface that delivers autonomy for future enhancements and changes.
- True zero footprint application.
- No downloads. No installs. No plugins.

Ready to unlock the power of Enterprise Imaging workflow orchestration?

Take the first step toward revolutionizing your health system with AGFA HealthCare Enterprise Imaging.

Reach out to us today to explore the limitless possibilities of efficient and streamlined workflows.
