Enterprise Imaging Cloud

Manage the unexpected

Enterprise Imaging Cloud* is a fully managed software service (SaaS) that provides better cost control, faster scalability, higher reliability and uptime, on-going infrastructure security, and a carefree operating lifecycle.

So you can offer your clinicians the seamless operating experience they need to stay productive, focused and satisfied every day of the year.

Enterprise Imaging, A complete picture

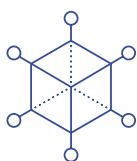

AGFA HealthCare Enterprise Imaging meets the challenges of today's modern health system with one of the first true medical imaging management platforms.

It integrates and embeds into Electronic Health Record (EHR) systems like Epic and Cerner, creating an Imaging Health Record™ (IHR).

It uses streaming technology to deliver frictionless image access to every user in near real time.

It enables a community of care across multiple IHRs through a seamless and secure Imaging Health Network™ (IHN).

With the RUBEE® Orchestrator, intelligent workflow orchestration empowers clinicians to optimize productivity, streamline operations, and devote more time to providing patient care.

Reduce complexity with Enterprise Imaging Cloud

Enterprise Imaging Cloud gives you all the benefits, functionalities and opportunities of the Enterprise Imaging platform, combined with the advantages of a fully managed Software-as-a-Service (SaaS) solution.

Enterprise Imaging deployed on the public cloud as a fully managed service reduces your workload and allows you to go-live quickly.

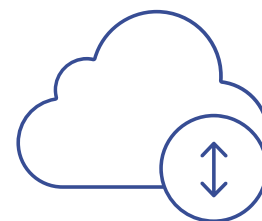

Deployment, capacity management, performance monitoring, infrastructure security, and data protection - Enterprise Imaging Cloud covers it all. So you can focus your time and resources on other valuable tasks, such as enhancing the experience of your clinicians.

* Released in the USA and Canada

Predictability you can count on

In today's complex healthcare environment, no one likes uncertainty. From costs to availability, Enterprise Imaging Cloud makes sure you know exactly what you are getting. There are no 'surprise' expenses for migrations, software upgrades, or hardware refresh. No questions about performance SLAs. No uncertainty about who is responsible for what. Enterprise Imaging Cloud alleviates the uncertainty and provides the predictability you need to operate at the top of your craft.

Tailored transformation

Enterprise Imaging Cloud is available in three packages, to match your goals, strategy and budget, and support you as you grow.

Diagnostic Essentials:

- Enterprise Imaging for diagnostic¹ and clinical service lines², general image acquisition for 65+ service areas, XERO Premium and Business Intelligence
- Ideal for community hospitals

Diagnostic Plus:

- Everything from Diagnostic Essentials, plus academic functions
- Ideal for academic and teaching providers

Diagnostic Premium:

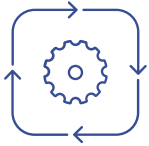

- Everything from Diagnostic Plus, plus all the latest AGFA HealthCare innovations
- Ideal for health networks and integrated delivery networks

	Diagnostic Essentials	Diagnostic Plus	Diagnostic Premium
El Diagnostic Service ¹	✓	✓	✓
El Clinical Service ²	✓	✓	✓
El General Image Acquisition for 65+ service areas	✓	✓	✓
El XERO Premium	✓	✓	✓
El Business Intelligence	✓	✓	✓
El Peer Learning		✓	✓
El Teach & Research		✓	✓
El Lesion Tracking		✓	✓
RUBEE AI Package ³			✓
RUBEE Orchestrator			✓
El Critical Findings			✓

¹ Radiology, cardiology, women's imaging, pathology, molecular imaging.

² Including POCUS, medical photography, and more.

³ Including activation of one RUBEE AI Package, excluding 3rd party algorithm.

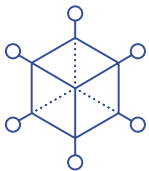

Always up-to-date

Updates, patches and Enterprise Imaging upgrades are included in Enterprise Imaging Cloud. You never have to worry about falling behind or missing out on the latest advances and innovations. Enterprise Imaging Cloud keeps you on the latest Enterprise Imaging Software release.

Unleash your growth

Offering unlimited user licenses, fast storage scalability and easy affiliate integration, Enterprise Imaging Cloud lets you grow in all directions, and increase your value to your community. Your platform adapts to changes in your data volumes, new imaging modalities, and the evolution of your facility – without delays to increase your capacity and without pre-investing in infrastructure for future expansion.

Imaging Health Network™: connecting partners in healthcare

Enterprise Imaging Cloud facilitates the creation of an [Imaging Health Network™](#) (IHN). Across facilities and sites, images are available 24/7 to all members of the care team – no matter where they are located, including on compatible mobile devices. It is easier than ever to experience the efficiency of streaming technology and provide seamless access to critical data – without geographic boundaries.

Working together to realize your Enterprise Imaging strategy

Our service organization is committed to your Enterprise Imaging Cloud experience from start to finish. Our dedicated team supports you with a smooth implementation, followed by customer care, managed and monitoring services, ongoing opportunities to learn, and more.

By enabling your seamless transformation, we can make sure you realize the long-term value of your Enterprise Imaging strategy.

Enterprise Imaging Cloud offers to IT Leadership:

- Reduced workload
- Better operating cost control
- Improved reliability and availability
- Managed security
- Maximized performance
- Fully managed Enterprise Imaging service
- Peace of mind, always up-to-date software, no risk of falling behind
- Satisfied clinicians

Are you ready to manage the unexpected, reduce complexity, enhance your users' experience, and increase cost control and predictability?
